When you're feeling run down and overwhelmed by high levels of stress, B vitamins can help you get back on track. Re:coupe provides a blend of complex B vitamins and chelate magnesium in an all-natural, food-based formula to help restore energy levels, support metabolism and promote healthy system function throughout the body. Complex B vitamins are essential nutrients for optimal health. A number of factors, including smoking, low daily caloric intake, alcoholic beverages, prescription drugs and chronic stress may rapidly deplete your body's stores of B vitamins. B vitamins play a key role in many metabolic functions, including energy, nerve function, brain function, liver function, digestion and promoting healthy skin, hair and eyes. Since B vitamins work synergistically to carry out their functions, it is best to supplement them as a group, or complex, to provide optimum results and avoid nutritional imbalance. Re:Coupe assures that you receive a complete and balanced source of all B vitamins in your daily supplement program.
